

In Situ

**INDONESIA**

## Meridiano Foundation <https://fundacionmeridiano.com>

Fundación Meridiano is an Argentine institution dedicated to professional consulting and academic research, with emphasis on international relations and economic development.

As a *think tank* in strategic issues, we produce analysis and inputs for interpretation and decision making; we are dedicated to analyzing international processes with an emphasis on exploring opportunities for Argentine national development.

As a *do tank*, our work is oriented towards action through consulting, carrying out commercial coordination projects, technical assistance, investment advice and technological cooperation - among others - for both the private and public sectors.

## In Situ Project <https://fundacionmeridiano.com/proyecto-in-situ/>

As agents of development, we aim to promote multi-level exchange and cooperation at the international level.

We maintain excellent relationships in Latin America, our region, and currently have representatives working in Europe (based in Germany and the Netherlands) and North America (based in the United States of America).

### **With the aim of privileging strategic links with Africa and Asia, we developed the In Situ Project.**

Through this initiative, we deploy on-site missions to these regions to study the conditions under which their development takes place, exchange experiences with local stakeholders—both in the professional and productive spheres, as well as in the institutional and academic spheres—and identify opportunities for cooperation and potential partners for our country.

## Degree of Progress

Through the In Situ Project, we have established **work agendas and cooperation agreements with public, private and third-sector institutions in more than 20 countries**, in the following areas:
